start here!

💡 OPEN THE EXAMPLE FILE FIRST

Spend two minutes clicking around a business that is already booked solid. When you are ready to go live, open a PREMIUM file and type over the demo content — or clear it in one go (page 3).

⚙️ What you need

- ✓ Excel 2016 or later (Windows or Mac), or Microsoft 365 — no older versions, no OpenOffice
- ✓ Google Sheets: import the file in four clicks (full walkthrough on page 11)
- ✓ No macros, no add-ins, no internet needed — it is pure formulas, so it also works offline
- ✓ A printer, if you like paper: every tab is already set up to print neatly

🔒 IF EXCEL SHOWS A YELLOW BAR

Files downloaded from the internet open in Protected View. Click “Enable Editing” at the top and everything wakes up. There are no macros in this file, so nothing else is required.

The three-minute setup

The screenshot shows the 'Setup' tab in the Novality Store application. The browser address bar shows 'Novality Store — Setup tab'. The page has a header with a gear icon, the word 'Setup', and a 'Back to Dashboard' button. Below the header, there are three tabs: 'Your business name & logo colours', 'Currency, tax & margins', and 'Drop-down lists you can edit'. The 'Business details' section contains a table with the following data:

Business details	
Business name	Saffron & Sage Catering Co.
Currency	\$ (dollar)
Season year	2026
Dashboard message	Confirm October crews early!

The 'Money rules' section contains a table with the following data:

Money rules	
Sales tax rate	5%
Target profit margin	35%
Deposit to book	40%
'Due soon' window	7 days

At the bottom, there is a section for 'Editable lists'.

- 1 **Name your business**
 ⚙️ Setup Business name, currency and season year. The dashboard and invoices pick these up automatically.
- 2 **Set your money rules**
 Sales tax %, target profit margin, deposit % and the “due soon” window — every quote and report obeys them.
- 3 **Type your lists**
 ⚙️ Setup Editable lists: event types, categories, staff roles, payment methods. Every dropdown reads from them.
- 4 **Add your world**
 Clients, events, menu dishes, ingredients, suppliers and equipment — one row each, dropdowns wherever possible.
- 5 **Work the pipeline**
 Move events from Inquiry to Confirmed; log expenses and payments as they happen.
- 6 **Enjoy the dashboard**
 📊 Dashboard needs no typing at all — it recalculates the moment you change anything anywhere.

🏆 THE GOLDEN RULES

White cells are yours — type in them freely. Tinted cells are formula cells: they are locked so the maths can never break.

Pick from the dropdowns instead of typing — the status, category and tick columns feed the dashboard.

Don't rename tabs or delete the hidden _Data sheet; the whole workbook reads from them.

The Dashboard — your command centre

You never type on this tab. It is a live picture of everything you have done everywhere else — open it every morning and it will tell you what needs doing.

What each part is telling you

- ✓ **Money cards** — cash in, cash out, net profit and margin, straight from your payments and expenses
- ✓ **Pipeline pills** — events on the books, confirmed, completed, average order value, outstanding and overdue
- ✓ **Charts** — revenue vs expenses by month and revenue by event type, redrawn as you book
- ✓ **Best performers** — your top-earning event type, highest-value client, food and labor cost percentages
- ✓ **Upcoming events and payments due** — the five closest, with overdue amounts in red
- ✓ **Alerts** — low stock, unpaid shifts, equipment needing service and overdue invoices, in plain English

- ✓ Owned, reserved, damaged and free are tracked per item — reservations come from confirmed events
- ✓ A 🚀 Suppliers tab keeps every vendor, price list and delivery term one click away

Calendar, Reports & the rest

Event Calendar — the month at a glance

- ✓ Bookings and payment deadlines share one grid — dots for events, triangles for dues
- ✓ The month and year are dropdowns on Setup; nothing to re-build next season

P&L, tax and the supporting cast

- ✓ Season P&L, sales-tax helper, monthly trends and best-performer tables — all from your entries
- ✓ Checklists cover prep week, shopping, event day and wrap-up; Invoice & Proposal prints a branded, pre-filled invoice per event

Using it in Google Sheets

The same file works in both. Start in Excel, move to Sheets, or skip Excel entirely — the import takes under a minute.

- 1 Open Sheets**
Go to sheets.google.com (free with any Google account) and start a blank spreadsheet.
- 2 File Import**
Choose the Upload tab and drag your .xlsx file in — or click “Select a file from your device”.
- 3 Replace spreadsheet**
In Import settings choose “Replace spreadsheet” so every tab arrives together, then click Import data.
- 4 Done**
Dropdowns, colours, conditional formatting, locked cells and charts all come along. Formulas become Google-native formulas.

What converts

- ✓ All 1,500+ formulas (translated to Google Sheets equivalents)
- ✓ Every dropdown menu and conditional-format colour rule
- ✓ Sheet protection — the formula cells stay locked in Sheets too
- ✓ Charts — Google Sheets rebuilds them from the same data

GOOD TO KNOW

Keep the original .xlsx — it is your master copy and works in Excel, Google Sheets and (formulas only) Apple Numbers.

Editing on the phone app works for quick ticks; the dashboard is happiest on a laptop or tablet screen.

Troubleshooting & FAQ

Q The numbers look wrong or stale

Press F9 (Ctrl+F9 on Mac) to force a recalculation. In Google Sheets reload the page. If you typed into a tinted cell by mistake, press Ctrl+Z.

Q A dropdown is missing an option

Add the event type, category or role on the  Setup tab — every dropdown updates instantly.

Q I typed in a formula cell and it broke

The tinted cells are locked, so this should not be possible. If a value looks odd, Ctrl+Z straight away, or re-download your files from Etsy.

Q Can I add more rows?

Yes — insert rows inside the existing tables (not above the first row) and the formulas copy down with them.

Q Can I print it?

Every tab has print areas set. File → Print, and it fits the page — the checklists and invoice were designed for it.

Q Where do I get updates?

Lifetime updates are included: re-download from Etsy → You → Purchases any time.
