Christmas Gift Tracker

USER GUIDE

Every gift, every dollar, every deadline — your five-minute tour of the planner that does the maths for you.

Excel 2016 +

Microsoft 365

Mac

Google Sheets

No macros

Your December, sorted 🎄

What you downloaded

Your purchase arrived as three Excel files (.xlsx). Nothing to install, nothing to enable — here is what each one is for.

PREMIUM — Festive

Your real planner. Classic Christmas reds & greens, watercolour cover.

Excel & Google Sheets

PREMIUM — Minimal

The exact same engine in a clean, modern look. Pick whichever you prefer.

Excel & Google Sheets

EXAMPLE — filled in

The demo from the listing pictures: 14 recipients, 25 gifts, every formula working.

Excel & Google Sheets

start here!

OPEN THE EXAMPLE FILE FIRST

Spend two minutes clicking around a tracker that is already full.

When you are ready to plan for real, open a PREMIUM file and type over the demo content — or start from a blank row.

⚙️ What you need

- ✓ Excel 2016 or later (Windows or Mac), or Microsoft 365 — no older versions, no OpenOffice
- ✓ Google Sheets: import the file in four clicks (full walkthrough on page 11)
- ✓ No macros, no add-ins, no internet needed — it is pure formulas, so it also works offline
- ✓ A printer, if you like paper: every tab is already set up to print neatly

IF EXCEL SHOWS A YELLOW BAR

Files downloaded from the internet open in Protected View. Click “Enable Editing” at the top and everything wakes up. There are no macros in this file, so nothing else is required.

The three-minute setup

Setup — make it yours [Back to Dashboard](#)

Three minutes, no formulas to write: set your date, budget and people — every tab updates instantly.

🎄 event: Christmas 2026 💰 budget: \$1,500 📢 alert: 85% 🛡️ Secret Mode: off

Your event

Event name:

Event date:
every deadline in the workbook recalculates from this

Countdown message:

Occasion: 18 occasions pre-loaded — birthdays, weddings, Diwali...

Money & alerts

Currency:

Total budget:
feeds the Budget tab & all the alerts

Alert me at: 🌐

Due-soon window: 🌐

Secret Mode

Hide gift ideas & costs from anyone peeking over your shoulder.

☐ Off — everyone can see everything

☒ On — ideas & costs hidden, 1-click toggle

Your people

☐ Mum ☐ Dad ☐ Grandma Rose ☐ Grandpa Joe
☐ Sister Emily ☐ Brother Jack ☐ Niece Sophie
☐ Nephew Leo

16 recipient slots • 16 stockings • 100+ gift rows

🎄 Christmas Gift Tracker © Novality Store Excel & Google Sheets

- 1 **Set your event**
⚙️ Setup Event name and Event date. Every countdown, deadline and key date in the workbook is calculated from that one date — nothing is hard-coded to a year.
- 2 **Make the money yours**
💰 On the same tab: currency, total budget, the % that triggers the budget warning, and how many days count as “due soon”.
- 3 **Type your people**
⚙️ Setup Your lists: recipients, relationships, stores, categories, hiding spots. Every dropdown in every tab reads from these lists.
- 4 **Add your gifts**
📺 Gift Tracker: one row per present. Use the Status dropdown as your pipeline — idea to delivered.
- 5 **Plan the money**
💰 Budget: type a planned amount per category. Everything else on that tab is automatic.
- 6 **Enjoy the dashboard**
🎄 Dashboard needs no typing at all — it recalculates the moment you change anything anywhere.

🏆 THE GOLDEN RULES

White cells are yours — type in them freely. Tinted cells are formula cells: they are locked so the maths can never break.

Pick✓ from the dropdowns instead of typing it — the tick columns feed the dashboards.

Don't rename tabs or delete the hidden `_Data` sheet; the whole workbook reads from them.

The Dashboard — your command centre

You never type on this tab. It is a live picture of everything you have done everywhere else — open it every morning of December and it will tell you what needs doing.

What each part is telling you

- ✓ Countdown band — days and weeks until Christmas, from your event date
- ✓ Money cards — budget, spent, remaining and % used, plus the amber warning when you cross your alert level
- ✓ Progress cards — planned, bought, wrapped, given, on order, average spend per person
- ✓ Progress bars — the block bars fill up as you buy and wrap
- ✓ Four charts — spending per person, budget vs actual, where the gifts are at, bought vs still to buy
- ✓ What's left to do — plain-English sentences written by the formulas ("4 gifts still to buy, 3 already on order...")
- ✓ Next deadlines — the five closest dates from every tab, with a days-left chip that goes amber inside your due-soon window
- ✓ Per-recipient summary — budget vs spend and a mini bar for every person on your list

Gift Tracker — the heart of it

🎄 Christmas Gift Tracker
© Novality Store
Excel & Google Sheets

📝 How to fill it in

- ✓ One row per present: who it is for, the idea, category, store and your budget — the dropdowns read your Setup lists
- ✓ The Status column is your pipeline: move each gift along the six stages as you go; the dashboard counts them automatically
- ✓ Cost, difference, % of budget, days left and the alert column are all tinted — they fill themselves in
- ✓ Buy-by dates come from your event date; a gift inside the due-soon window turns amber, an overdue one turns red
- ✓ Wrapped✓ and Given✓ are the last two ticks — tick them and the Wrapping tab updates itself

Budget — watch every dollar

Planned vs automatic vs manual

- ✓ Planned — type your target for each of the 10 categories (rename them if your Christmas looks different)
- ✓ Pulled in automatically — the tinted column adds up the real money from the Gift Tracker, Shopping List, Stockings and card postage
- ✓ Extras — for spending that lives outside the tabs (travel, the tree, the turkey), type it once in the manual column
- ✓ Remaining and % used recalculate instantly; a category over budget turns red, nearly over turns amber
- ✓ The banner at the top warns you in plain English the moment you cross the % you set in Setup (default 85%)

Wish List & Shopping List

💡 Wish List — ideas all year round

Novality Store — Wish List

Wish List & Gift Ideas

Hints all year round, ranked by how much they really want them.

💡 12 ideas saved ★ 5 must-haves 💰 \$590 value

SUMMARY 7 of 20 complete next: 20 Nov auto re-dates from EventDate

Christmas Gift Tracker © Novality Store Excel & Google Sheets

- ✓ 20 classic Christmas tasks come pre-loaded, each with a deadline calculated from your event date
- ✓ Tick the ✓ column as you go; overdue tasks turn red, coming-up ones amber

Use it again next year — and for every occasion

- 1 Change the date**
⚙ Setup Event date 25 Dec 2027 (or any occasion: birthdays, Diwali, weddings...). Every countdown, deadline and to-do re-dates itself.
- 2 Clear your rows**
Select the white cells in the Gift Tracker, Orders, Cards, Stockings and To-Do tabs and press Delete. Your people, stores and categories in Setup stay put.
- 3 Start planning**
Your Wish List carried over — the ideas you parked in January are exactly where you need them in November.

Christmas
 Secret Santa
 Birthdays
 Weddings
 Diwali
 Baby Shower
 + 12 more

Using it in Google Sheets

The same file works in both. Start in Excel, move to Sheets, or skip Excel entirely — the import takes under a minute.

- 1 Open Sheets**
Go to sheets.google.com (free with any Google account) and start a blank spreadsheet.
- 2 File Import**
Choose the Upload tab and drag your .xlsx file in — or click “Select a file from your device”.
- 3 Replace spreadsheet**
In Import settings choose “Replace spreadsheet” so every tab arrives together, then click Import data.
- 4 Done**
Dropdowns, colours, conditional formatting, locked cells and charts all come along. Formulas become Google-native formulas.

What converts

- ✓ All 2,500+ formulas (translated to Google Sheets equivalents)
- ✓ All 56 dropdown menus and every conditional-format colour rule
- ✓ Sheet protection — the formula cells stay locked in Sheets too
- ✓ Charts — Google Sheets rebuilds them from the same data

GOOD TO KNOW

Keep the original .xlsx — it is your master copy and works in Excel, Google Sheets and (formulas only) Apple Numbers.

Editing on the phone app works for quick ticks; the dashboard is happiest on a laptop or tablet screen.

Troubleshooting & FAQ

Q The numbers look wrong or stale

Press F9 (Ctrl+F9 on Mac) to force a recalculation. In Google Sheets reload the page. If you typed into a tinted cell by mistake, press Ctrl+Z.

Q A dropdown is missing a name

Add the person or store on the  Setup tab — every dropdown updates instantly.

Q I typed in a formula cell and it broke

The tinted cells are locked, so this should not be possible. If a value looks odd, Ctrl+Z straight away, or re-download your files from Etsy.

Q Can I add more rows?

Yes — insert rows inside the existing tables (not above the first row) and the formulas copy down with them.

Q Can I print it?

Every tab has print areas set. File Print, and it fits the page — the block progress bars are designed for exactly that.

Q Where do I get updates?

Lifetime updates are included: re-download from Etsy You Purchases any time.

LICENSE & SUPPORT
